

# RE5R05A

Nissan 5-Speed Transmission

## LIKE NEW - ONLY BETTER

These are only a few updates and upgrades we make to our RE5R05A transmissions

*Tru-Flat* process applied to case, valve body, and pump prevents cross-leakage and delivers consistent performance.

Completely remanufactured valve body with new pressure switches and, when needed, speed sensors. All valve bodies are tested independently to verify proper operation prior to the dynamometer testing of the completed transmission.

New ETE-spec bushings improve internal fluid flow control and pressures.

All bushings and machined surfaces are polished to a mirror-like OE finish of 15 RA or better.

Fully remanufactured torque converter is tested for leaks, lockup, concentricity, and balance. Upgrades exceed OE requirements and eliminate the possibility of front seal leaks, premature bushing wear, and vibration.

Complete road simulation testing using ETE's very own dynamometer testing program called CARS (Computer-Aided Road Simulation). Every transmission is cold- and hot-tested while using ETE's fully SynthETEC™ transmission fluid and filtration system.

**3 Year/Unlimited Mileage  
Hassle-Free  
Nationwide  
Parts and Labor Warranty**
